

HARSH YADAV

Frontend Developer | React | JavaScript | Tailwind CSS | UI Engineering

Location: Baghpat, UP, India, **Mobile:**+916397067184

Email: iharsyadav@gmail.com, **GitHub:** [iharsyadav](#) **Portfolio:** [iharsyadav](#)

SUMMARY

Frontend Developer with experience in building responsive web applications, reusable component systems, modern user interfaces, and performance-optimized frontend solutions. Skilled in React.js, JavaScript, Tailwind CSS, CSS architecture, responsive design, and frontend optimization. Passionate about transforming complex design requirements into scalable, maintainable, and visually polished web experiences.

TECHNICAL SKILLS

Frontend: React.js, JavaScript, HTML5, CSS3

UI & Styling: Tailwind CSS, Sass / SCSS, Bootstrap, Framer Motion

Tools & Ecosystem: Git, GitHub, Vite, VS Code, Notion, Figma, OpenAI

Future Focus: Next.js, Full Stack Development

PROFESSIONAL EXPERIENCE

Independent Frontend Developer (2025 – Present)

- Successfully built 20+ digital products using React and modern frontend technologies.
- Engineered responsive and high-performance user interfaces with precise layout execution.
- Developed reusable component systems and scalable frontend architectures.
- Implemented advanced CSS Grid and Flexbox layouts for complex design requirements.
- Converted high-fidelity UI designs into production-ready applications.
- Improved performance through asset optimization, code splitting, and modern build practices.
- Ensured cross-browser compatibility and mobile responsiveness across projects.
- Maintained clean, modular, and maintainable codebases.

KEY PROJECTS

[CodeDotin](#)

Modern frontend component library featuring animated UI blocks, reusable layouts, responsive sections, and premium motion interactions.

[iMusic](#)

Full-stack music streaming application with song uploads, audio playback controls, genre filtering, search functionality, responsive music library, dark/light themes, Cloudinary media storage, and real-time track management.

[EmpFlow](#)

Full-stack employee management platform with role-based authentication, HR dashboard, employee profiles, and modern frontend architecture.

[Authentication UI App](#)

Modern authentication interface with smooth page transitions, animated layouts, floating gradients, and responsive onboarding screens.

[Utility Toolkit App](#)

Developed a comprehensive utility platform featuring multiple CSS generators and frontend development tools, including Glassmorphism, Neumorphism, Claymorphism, Gradient Generator, and Shadow Generator. Built with React and modern UI practices, focusing on responsive design, real-time previews, code generation, and developer productivity.

EDUCATION

Bachelor of Technology (B.Tech) - Information Technology-IMS Engineering College, Ghaziabad
