

PROFESSIONAL SUMMARY

Detail-oriented and passionate Frontend Developer who treats UI like a craft. Specializes in building highly responsive, pixel-perfect web applications with a keen eye for animation, micro-interactions, and flawless responsive layouts. Proven track record of turning complex design requirements into modular, scalable, and high-performance component architecture.

PROFESSIONAL JOURNEY & EXPERIENCE

Frontend Developer *Independent /*

Successfully build 20+ Digital Products

- Engineered high-fidelity, fluid web interfaces utilizing React, ensuring cross-browser styling consistency and precise layout execution.
- Developed fully reusable, custom layout modules optimizing modern CSS Grid and asymmetric Flexbox implementations.
- Collaborated closely with visual workflows to accurately translate high-fidelity UI design files (Figma tokens) into maintainable, component-driven production code.
- Significantly enhanced browser performance and Lighthouse scores through asset optimization, bundler configurations, and targeted code-splitting.

FEATURED PROJECTS

[CodeDotin](#) (React & Tailwind CSS)

Modern frontend component library featuring animated UI blocks, reusable layouts, responsive sections and premium motion interactions.

[iMusic](#) (React, Tailwind CSS, MongoDB, Cloudinary)

Full-stack music streaming application with song uploads, audio playback controls, genre filtering, search functionality, responsive music library, dark/light themes, Cloudinary media storage, and real-time track management.

[EmpFlow](#) (React, Tailwind CSS, MongoDB, Node.js, Express.js)

Full-stack employee management platform with role-based authentication, HR dashboard, employee profiles.

[Authentication UI App](#) (React ,Local Storage,)

Modern authentication interface with smooth page transitions, animated layouts, floating gradients and responsive onboarding screens.

TECHNICAL SKILLS

Core Frontend

HTML5, CSS3, JavaScript, React ,

UI & Styling

Tailwind CSS, Sass / SCSS, Framer Motion, Bootstrap

Tools & Ecosystem

Git / GitHub, Vite, Notion, npm, VS Code

Future Focus

Node.js ,Express,FullStack

IMPACT METRICS

20+ Successful Projects

100+ git commit

CORE IDEOLOGY

"Treating user interfaces like craft by prioritising modular code, semantic accessibility, and visual delight."
